COMPLIANCE WITH
RULE 17.1(a) OR (b)

FORM 1
THE PATENTS ACT, 1970
(39 of 1970)

APPLICATION FOR GRANT OF PATENT
[See sections 5(2), 7, 54 and 135 and rule 33A]

I, Gautam Dharamdas Goradia an Indian National of 2nd Floor, Lilouville, West Avenue, Santacruz (West), Mumbai – 400 054, Maharashtra, India, do hereby declare :-

- (a). that I am in possession of an invention titled "JOKES AND HUMOR BUILDING SYSTEM"
- (b). that the Provisional Specification relating to this invention is filed with this application.
- (c). that there is no lawful ground of objection to the grant of a patent to us.

Further declare that I myself is the true and first Inventor for the said invention.

That I myself is the assignee of the true and first Inventor.

That my address for service in India is as follows :

Krishna & Saurastri
74/F, Venus, Worli Sea Face,
Bombay – 400 018, India.

That to the best of my knowledge, information and belief the fact and matters stated herein are correct and that there is no lawful ground of objection to the grant of patent to me on this application.

Following are the attachment with the application :

- (a). Application for Grant of Patent on Form-1 (3 copies).
- (b). Form 3 (- do -).
- (c). Declaration as to Inventorship on Form-5 (- do -).
- (d). Provisional Specification (triplicate)
- (e). General Power of Attorney.

I/We request that a patent may be granted to me/us for the said invention.

Dated this 14th day of May, 2003.

To,
The Controller of Patents

Mumbai.

PROVISIONAL SPECIFICATION
[See section 10]

JOKES AND HUMOR BUILDING SYSTEM;

**GAUTAM DHARAMDAS GORADIA, AN
INDIAN NATIONAL OF 2ND FLOOR,
LILLOUVILLE, ... WEST AVENUE,
SANTACRUZ (WEST), MUMBAI - 400
054, MAHARASHTRA, INDIA;**

**THE FOLLOWING SPECIFICATION
DESCRIBES THE NATURE OF THIS
INVENTION.**

Jokes and Humor Building System

Jokes and Humor Building System, the main purpose of which is to provide to and/or to allow the User to build a data bank of Jokes and Humor for the purpose of using the same as part of ones' Social life and to assist in stress relief, it being accepted that laughter in general assists in stress relief, which would help in overall health improvement of a person. Such data can be stored User wise, and which can be stored by various classifications. The data so built can be customized using the various utilities of the System.

The System's other purpose is to use such data for stress relief related with the continuous usage of computers and or other work, by scheduling the appearance with or without voice of such jokes and humor to appear on one's system, including hand held devices. The records to be used for the scheduler can brought forth by finding them based on a Find condition set by the User.

The System's other purpose is to use such data for stress relief related with the continuous usage of computer systems and or other work, by invoking the Laughing Session, a utility available to the User, where Jokes and such Humor appear with or without voice on one's system, including hand held devices. The records to be used for the Laughing Session can be brought forth by finding them based on a Find condition set by the User.

The System uses a software in a computer system comprising one or more databases to store data User wise. There is a well defined data input module

available to the User to create the User's own databank of Jokes and Humor on any Subject.

JOKES BANK

There is a User Interface allowing the User to enter Jokes and Humor at least by one or more classifications like the Date of entry, the record ID., the Source of Information, the Age Group as may be relevant to the record in the opinion of the User, the Type of the Joke or Humor, e.g. Joke, Satire, Riddle etc. as may be relevant to the record in the opinion of the User and the Subject as may be relevant to the record in the opinion of the User.

The System also allows the User to attach any media file to the said record, the same being capable of being played/displayed. This module further allows the User to associate any kind of additional information in terms of file(s), URLs and Remarks, file(s) and URLs being able to be opened by the System, the Remarks being simply displayed.

FEATURE LIST

The System provides the following features to the User:

While creating a new data record, the System provides the utility of copying an existing entry with respect to at least the various classifications under which the User may have stored and/or modified the entry being copied, such "Copy Current Entry?" utility being of immense use to the User to simplify the creation of records having at least common classifications and/or other information in the Jokes Bank as explained above.

The System provides the utility of modifying a record stored in the Jokes Bank as described above. The records can be modified by finding them based on a Find condition set by the User. The System also provides the further utility of "Global Modifying" where the User can select the records to be Globally Modified, with respect to "Finding and Replacing" one or more of some of the relevant classifications that the User may have used to classify the data when entering or modifying a record, and where the User can make further selections before actually modifying the records Globally. Text entered in any field can also be "found and replaced" Globally.

The System provides the utility of deleting a record stored in the Jokes Bank as described above. The records can be deleted by finding them based on a Find condition set by the User. The System also provides the further utility of "Global Delete" where the User can select the records to be Globally Deleted, The records can be deleted Globally, however, with the User having the utility of making further selections before actually deleting the records Globally.

The System provides the utility of printing a record stored in the Jokes Bank as described above. The records can be printed by finding them based on a Find condition set by the User. The Printing utility further comprises of printing the records with other print conditions such as printing a single record, or printing the results without further selections, or printing the results selectively, or printing the entire set of records with further selections if needed. The Printing utility provides the User the ability to customize the Header and Footer details.

The System provides the utility of navigating between records in the Jokes Bank as described above.

The System provides the utility of Finding records in the Jokes Bank as described above by a Find condition as may be set by the User.

The System provides the utility of Book marking or Unbook marking one or more already Book marked records in the Jokes Bank as described above and having the further utility of "Global Bookmark/Unbookmark" where the User can select the records to be Globally Bookmarked/Unbookmarked, and where the User can make further selections before actually Globally Bookmarking/Unbookmarking the records.

The System provides the utility of Exporting records (by creating a database file) stored in the Jokes Bank as described above by finding the records based on a Find condition as may be set by the User.

The System provides the utility of Importing records from a database file that may have been created by another User of this System. Imported records append the User's databank.

The System provides the utility of creating, editing, deleting, printing, navigating, finding Masters like; User, Age Group, Info Source, Type, Subject etc. Sufficient security is provided by the System, so as not to allow the deletion of any Master that may be in use.

The System has a well classified module capable of allowing the User to take Laughing Sessions, (such Laughing Sessions being capable of being taken by more than one user at the same time) using the data from the database, such data having been selected by the User based on a Find condition set by the User. In such Laughing Sessions, data is displayed to the User, one by one, with a Timer facility allowing the User to set the time of display of each record as well

as the number of records to be used for the Session. The User has the ability to select between taking the Laughing Session with or without Text to Speech Engine Voice support to be provided by the System.

The System has the utility of Restoring or Permanently Deleting a record, which may have been deleted by the User from the Jokes Bank. The System also has the further utility of selectively Restoring or Permanently deleting a record or a group of records, the records being displayed to the User in the Recycle Bin module. Any record Restored is sent back to the Jokes Bank, with its original ID Number.

The System has the utility of System maintenance tools such as Back Up, Restore and Compression of the entire database and System Check. There are other tools such as Start Up options, Change Sound, Change Font, Customize Header and Footer, Remove Evaluations, Label Printing and Help.

The System has the utility wherein one or more module / utility can operate within a browser and/or other viewing and/or processing programs, and can operate on one or more systems.

The System has a translation utility, allowing the User to consider any record as a parent language record and translate the same in any language of the User's choice, that may be available with the System, the translation activity happening from a translation module which is called in the Jokes Bank, and further that all of the features and/or utilities/functionality of the System remaining common to the translated record as would be applicable to the parent language record.

The System with the relevant technology allows the User to input and/or modify data in Vocabulary input module as described above, by Voice input, and

further that the System speaks out the data so entered/modified by the User in the Jokes Bank as described above.

There is an Anti Piracy system embedded requiring the User to enter valid information in a form and to submit the form to the relevant Web Site for the purpose of registration. Upon valid information being provided by the User, the User would be provided with an Access Key to complete the Registration Process. The System would operate only on such computer system from which the User has registered the System on the Web Site.
